

REIMAGINE PHARMACY CARE TECHNOLOGY

Streamline medication management.

Improve patient safety.

CarepathRx Technology Solutions delivers the industry's most advanced telepharmacy and technology platforms to support patients across the healthcare continuum. Our industry-leading technology integrates directly with hospital EHR and dispensing systems, allowing your clinical teams and patients to more effectively manage complexities associated with specialty pharmacy and transitions of care.

Let CarepathRx improve your medication adherence and safety metrics using real-time data and establish a single point of contact to manage referrals, refills, and patient care.

Contact techsolutions@carepathrxllc.com to see how our technology can improve your business and your patients' lives.

Expertly designed and intuitive, *DromosPTM* can be integrated right into your dispensing system for increased productivity and patient safety.

This cloud-based patient therapy management is uniquely tailored for your Specialty Pharmacy program, providing bi-directional integrations with dispensing systems, including medication refill requests, efficient and configurable patient assessments, reporting on limited distribution drugs, and a mobile application that serves retail and specialty patients in one platform.

- Streamlined Specialty Pharmacy processes
- Simplified Limited Distribution Drug (LDD) reporting
- Advanced system integrations
- Efficient and configurable Patient Assessments
- Designed to meet all accreditation needs

EXPERTLY DESIGNED

For pharmacists. By pharmacists.

INTUITIVE NAVIGATION

Priority-driven navigation is simple and easy.

WORKFLOW FLEXIBILITY

Adapts to your unique pharmacy operation.

INTEGRATED SYSTEM SUPPORT

Rapid notification and response.

CAREPATHRX PATIENT THERAPY MOBILE (PTM)

Mobile patient care made simple! *DromosPTM* paired with *CarepathRx PTM* provides pharmacies one workflow to manage patient counseling and refill calls.

HOW IT WORKS: Your patients are sent refill reminders via push notifications with a refill questionnaire embedded right into the process. Patients confirm their delivery date and shipping address and answer a few simple questions as required by the pharmacy.

That's it! Your staff is ready to dispense the refill. This feature allows patients to communicate with your pharmacy how and when they want, improving patient satisfaction while reducing time and cost associated with completing medication refills.

HOW IS CAREPATHRX PTM DIFFERENT?

Our technology interfaces with both retail and specialty pharmacies alike, creating a single, streamlined resource for all pharmacy patients across the healthcare continuum.

 **MOBILE PATIENT CARE**

 **REFILL REMINDERS**

 **SECURE MESSAGING**

 **RETAIL & SPECIALTY**

Developed by PipelineRx, *PowerGridRx™* is the industry's only cloud-based enterprise platform designed exclusively for end-to-end clinical medication management.

Whether you are a community hospital, a large IDN, or a specialized facility, our medication order management system can help you optimize and transform your pharmacy, amplifying the impact on patient care.
